

# Disparities in Access to Water and Sanitation in Brazil

While access to safe water and sanitation has increased over the past decade, there are still deep inequalities in access between regions, rural and urban communities, and households.

## Rural water sanitation service levels

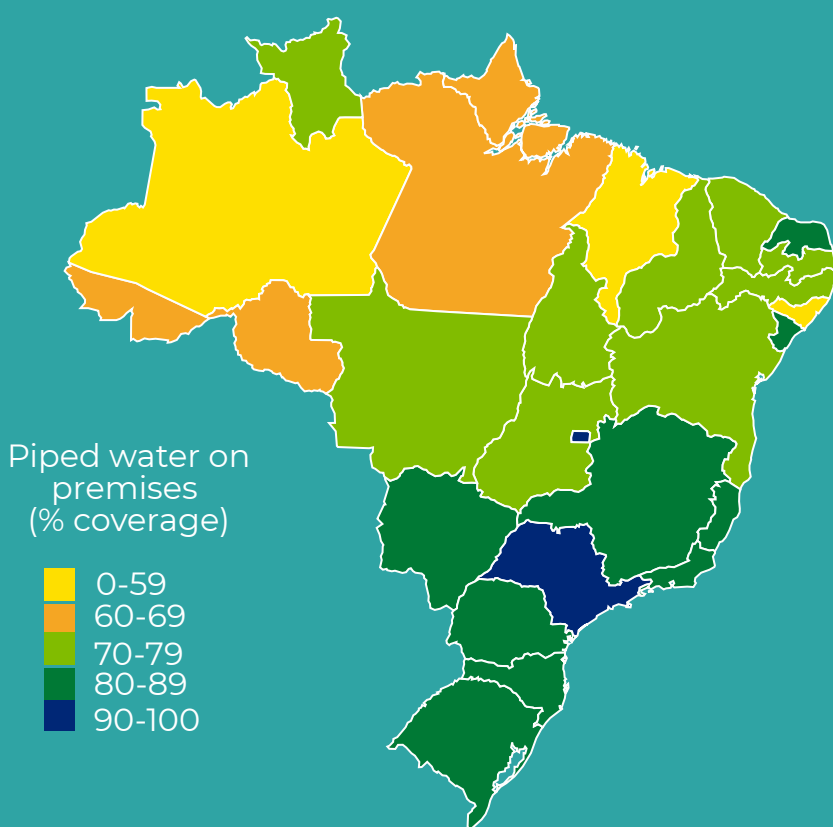

## Urban water sanitation service levels

## Regional Inequalities in Access to Safe Drinking Water

Piped water on premises varies by regions in Brazil, with lowest levels in Acre, Amapá, Rondônia and Pará

## Water and Sewage Coverage in Brazil

# 30%

of Brazilians still lack access to improved sanitation
